MILITARY ACTIVITY
CEASE-FIRE ZONE, EGYPT

25X1D

PREFACE

1. This report provides details on the status of military activity in the cease-fire zone of Egypt during the period [redacted]. Occu-
pancy status is provided for the 100 SA-2 and five SA-3 surface-to-air missile
(SAM) sites that are located within the 50-kilometer zone* west of the Suez
Canal. The criterion for determining occupancy was the identification, within
the site, of missile equipment, dummy missile equipment, or objects which could
not be identified as non-missile-related equipment. Thus, the designation of
a site as occupied does not constitute a judgment that the site is operational.

25X1D

HIGHLIGHTS

3. A suspect SA-2 SAM site (Site 333) was newly identified on [redacted]
22 nautical miles (nm) northwest of Suez at 30-10-30N 032-12-30E. The site
consisted of one possible drive-through launch position, a possible bunkered
guidance area, and two areas of unidentified construction immediately adjacent
to the site. The site was unoccupied, and the status of construction activity
probably had not changed since [redacted]

25X1D

4. Two SA-2 sites (Sites 195 and 217), previously reported as unoccupied,
were occupied on [redacted]. Site 195 was unoccupied; on [redacted]
its occupancy was unknown; and on [redacted] one launch position was
occupied by an unidentified object, and two launch positions were possibly
occupied with unidentified objects [redacted]
Site 217 was unoccupied on [redacted] one launch position was occupied by an
unidentified object on [redacted] photography of poor interpretability.

5. A previously destroyed heavy ponton bridge across the Port Said
Association Company Canal just south of Port Said was being repaired on [redacted]
[redacted] Figure 1.) and completely spanned the canal on [redacted] (Figure 2).
The bridge allows direct vehicular access from the Port Said area to Egyptian
positions confronting [redacted] strongpoint 2.5 nm to the south on the east
bank of the Suez Canal.

SAM SITE STATUS

6. One-hundred SAM sites had been identified in the cease-fire zone of
Egypt as of [redacted]. The following is a summary of their occupancy during
the period [redacted]

*Based upon information from the Department of State delineating the 50-kilo-
meter cease-fire zone. The eastern boundary of this zone is the center of the
navigation channel through the Suez Canal and the Great Bitter Lake.

7. Detailed occupancy status and order of battle for SAM sites in the cease-fire zone of Egypt are given in Table 2, which is keyed to Figure 3. The column heading "NUMBER" indicates the arbitrary number assigned to the site by NPIC when the site was first identified. The following abbreviations appear in the table: OCC for occupied, UNP for unoccupied, and UKN for unknown. A blank space indicates that the site was not covered by photography of that particular date.
